PROFILE

- Results-driven full-stack developer with 6+ years of experience in building scalable web and mobile applications.
- Skilled in JavaScript/TypeScript (React, Next.js, Node.js), PHP Laravel, RESTful APIs, GraphQL, and state management.
- Hands-on experience with headless eCommerce platforms.
- Experienced with Vercel, GCP, Claude AI integration

SKILLS

FRONT END DEVELOPMENT

- Languages: JavaScript, TypeScript, HTML5, CSS(Tailwind CSS, Sass)
- Framework: Reactjs, Nextjs.
- Test: Jest, Cypress.
- UI/UX Tools: Figma, Responsive Design, Framer-motion.
- Dev tools: Redux (Zustand, React-redux), Webpack/Turbopack, npm, pnpm, yarn.
- Design Principles: Modern UI/UX Design, Atomic Design.

CLOUD SERVICE

Docker, GCP, AWS (API Gateway, Lambda, S3, SQS), Supabase.

BACKEND DEVELOPMENT

- Languages: TypeScript, Java, PHP
- Frameworks: Nodejs, NestJs, Laravel
- APIs: REST, GraphQL
- ORMs: Prisma, TypeORM
- Microservices: Lamda, Kafka, Serverless Framework.

AI & Frameworks

Genkit, RAG, Multi-modal AI, Image Segmentation/Inpainting, Tool/Function Calling, Vector Search.

PROFESSIONAL EXPERIENCE

Full stack developer, Hello Molly

08/2024 – present | Sydney

- **Boosted Next.js front-end performance by 18%** and **cut redundant API requests by 80%** using advanced rendering strategies (SSG) and optimized data-fetching workflows.
- **Migrated a legacy React return portal to a Next.js monorepo**, significantly improving system architecture and codebase maintainability.
- **Developed PHP Laravel applications**, delivering robust API endpoints and background job queue functionalities to meet evolving business needs.
- **Architected a DatoCMS system** and collaborated cross-functionally with UI/UX and Marketing teams to streamline content workflows.
- **Designed and deployed an internal AI-driven asset generation system**, reducing time-to-market for digital product listings by automating background removal and object extraction.
- **Built a scalable model-swap pipeline using Genkit workflows**, eliminating the need for recurring reshoots by programmatically adapting core product visuals to diverse digital models.
- **Implemented an advanced RAG and data discovery layer**, syncing relational data to BigQuery to allow team members to seamlessly fetch internal knowledge base insights and web data via natural language.
- **Optimized pipeline error-handling and retry middleware**, ensuring high availability and cost-efficient token usage across high-volume vision and language model API calls.

Full Stack Developer, Joidea Group

11/2022 – 07/2024 | Sydney

- Developed dynamic and responsive web applications, improving user experience and engagement.
- Designed and maintained RESTful APIs, ensuring robust and scalable server-side business logic.
- Integrated third-party services and APIs to enhance functionality.
- Designed and optimised Webpack configurations to improve the build process.
- Implemented unit testing, end-to-end (e2e) testing and CI/CD pipeline to ensure project stability and reliability.
- Utilized Docker and Docker Compose to containerise applications, improving deployment consistency and scalability.
- Collaborated with cross-functional teams in an Agile environment for high-quality software delivery.
- Participated in code reviews to maintain the quality of codebases.
- Contributed to the knowledge base by creating system documentation.
- Analyzed existing processes and codebase, providing recommendations for improvements/efficiencies.

Junior Full Stack Developer (Start-up), Aqtiv Pty Ltd

08/2020 – 10/2021 | Sydney

- Built features in TypeScript for both frontend and backend applications.
- Developed a landing page and hosted a multi-step onboarding page to improve user experience.
- Developed an admin dashboard with many features like analysis charts and email editor.
- Set up and configured app push notifications with firebase-cloud-messaging.
- Utilized Jira to track project tasks and progress, ensuring timely completion of development milestones and effective team collaboration.
- Contributed to the growth of the start-up by developing innovative solutions and features that enhanced product offerings.

Web Developer Internship, Ishare Incubator Pty Ltd

03/2020 – 08/2020 | Sydney

- Collaborated with senior developers to build new features and API.
- Developed UI design components based on the design provided.
- Supported daily stand-up meetings by updating Jira boards and providing status updates on assigned tasks.

EDUCATION

**Bachelor of Information Technology(Mobile Application Development),
Academy of Interactive Technology** [🔗](#)

2017 – 2020 | Sydney

CERTIFICATE

AWS Certified Solutions Architect

06/2024

Validate no: e3e811ebe34a4c9fb6b8510f3fb1526b

Introduction to AWS CloudFormation

07/2025

Certificate ID: 6bbb14aee82ff8cf5b19ec9a01a6db7fb05e10a169b0dd15d82807f5fb84e4c0
